Education

Dwarkadas. J. Sanghvi College of Engineering

BTech in Electronics and Telecommunication Engineering

- CGPA: 8.52

Mumbai, India

Feb 2021 - June 2024

Smt. Shantidevi Shukla Junior College of science

HSC

- Percentage: 71.54%

Mumbai, India

March 2020

Work Experience

Ring

Software Developer

Mumbai, India

June 2024 - Present

- Developed and maintained advanced infrastructure tools using React.js, ensuring industry-standard compliance. Proficient in React.js, Redux, and front-end development
- Developed various components and features of frontend by understanding the design and fixing bugs.
- Collaborated with team members using version control systems such as Git to organize modifications and assign tasks.

Kissht / Ring

Software Developer Intern

Mumbai, India

June 2023 - Aug 2023

- As a Software Developer, I was responsible for developing a portal for the company's team. My responsibility was on utilizing various technologies such as React, Redux, Tailwind CSS, Axios, and Golang to build a robust and user-friendly platform.
- Within this role, I collaborated with the team to gather requirements and translate them into practical solutions. I actively participated in the entire software development lifecycle, from conceptualization and design to implementation, testing, and deployment.

Projects

NexusPay

- Developed Nexus Pay, a decentralized crypto payment solution enabling easy peer-to-peer and merchant payments using QR codes and Nexus IDs.
- Features include dollar-denominated transactions, seamless withdrawal to bank accounts, and universal access via Google login.
- Technologies Used: Next.js, tailwind css, daisy ui.

Samvad - Cross-Chain Decentralized Forum

- Designed and developed user interfaces for the Samvad platform using React.js and web3 libraries.
- Implemented features for creating posts, making replies.
- Collaborated with backend developers to ensure seamless integration of frontend with smart contracts and Chainlink's CCIP.
- Implemented real-time gas price estimation using Metamask/Infura for user transactions.
- Technologies Used: Next.js, Solidity.

BuildFi - Decentralized Crowdfunding Platform for Developers

- Developers can attract investors by committing a portion of their project's token, with funds disbursed based on milestone completion.
- Developers set milestone timestamps and payout percentages, with investors voting on completion based on off-chain content or third-party verification.
- Technologies Used: Next.js, Solidity.

Achievements

- Won best Implementation of ChainLink CCIP prize at ETHIndia 2023 hackathon.
- First prize winner for On-chain Identity by RISC zero at Scaling Ethereum 2024 hackathon.
- Winner at Coinbase Onchain Summer Buildathon.
- Best use of Fhenix stack at Eth Singapore 2024.

Skills

Languages: Javascript, Typescript, Solidity

Web Development: React, Nextjs, HTML, CSS, Tailwind CSS, Git, GitHub

Non-Technical Skills: Effective Communication, Teamwork, Adaptive Learning.
